

CE LIGHTING SYSTEM

Cooledge Lighting Technology

Integrated in Wesport Lighting Products

Product Description:

Flexible LED sheeting fabricated by Cooledge Lighting in various widths, color temperatures and widths. These products are ideal in that they run cool to the touch and for this reason work extremely well in keeping working temperatures low especially in small and confined designs.

Application:

The flexibility aspect of this product as well as its wide array of LEDs makes Cooledge linear strips ideal for illuminating ring pendants and where wide 360 illumination is desired. Wesport utilizes Cooledge technology in several of its lighting collections including EOS and Eclipse.

Environmental:

For indoor or damp usage only.

Warranty:

5 year warranty from manufactured date when installed and used in accordance with manufacturers conditions of installation and usage.

Drivers:

Drivers are universal 120-277 V input with 0-10V dimming

Available Color Temperatures

Cooledge linear modules are available in 2700K, 3000K, 3500K, 4000K and 5600K

Specification Sheets:

The information contained here in is designed to provide general product information. Actual spec sheets of the specific products utilized in Wesport fixtures are provided on request.
