

EURO

Basics

In their most basic form all Euro Fixture frames are fabricated out of white acrylic sheeting formed in a variety of shapes . Acrylic shades come in a variety of opacities, making them ideal for lighting fixtures. They are very durable and readily clean able.

Meeting Architectural Lighting Needs

Wesport Lighting has available IES files on numerous Euro fixtures in all white acrylic and can make available others on request. Please contact the factory regarding your specific needs.

Meeting Decorative Lighting Needs.

By applying decorative perimeter materials on the faces of our shades, Wesport is able to integrate a variety of colors , patterns and visual textures. Some of our materials such as our digital prints are highly cleanable and sanitizable. The above features make Euro highly applicable for healthcare, educational and hospitality settings

Application: Commercial building

Shown on right: EU1009D with all white acrylic

EU1016B

Minimal Accents and Shadow Lines

Because we use no metallic frame components with many of our Euro designs, a number of fixtures in this collection show virtually no shadow lines as exemplified in the above photo. The above EU1016 is illuminated by an LED array with an integral driver that rests on the top end of the fixture allowing full and non-interrupted illumination of the shade. Applied to its perimeter are our Kara Aqua digital print on the top tier and Kara Brown on the bottom tier. Contact the factory for more information on other minimal shadow line designs.

EU1022

Our EU1022 are flush and or semi-flush mounted fixtures available in three different widths ranging from 12" to 24". All are LED illuminated with an LED array system with an integral 120-277 V input driver. EU1022 fixtures are dimmable with a 0-10 V dimming protocol. Add any one of our decorative digital prints or natural veneer perimeters to complement specific design needs. Above photo is our EU1022A, 12" wide by 6" H accented with our Kara Brown digital pattern and a brushed nickel cap. This flush ceiling fixture has excellent application potential in health care, and hospitality.

EU1009B

Application
Corporate
Office

Above photo is of our EU1009B, 36" W by 8" H with our Micro Orange perimeter illuminated with our 7200 lumen DMMOD module system.

Special Features

The acrylic frames that constitute the skeleton of Euro Collection are more durable than fabric shades. Unlike cloth this substrate will not deform or become unglued over time. Our decorative perimeters will not fray or detach from their surfaces.

EU1020C

Application: Conference room

All acrylic linear pendant available in various sizes and decorative perimeter options. This 3" wide by 3.25" frame is supported on each end with stainless steel aircraft cable and powered on one end with clear cord. Our 120-277 V universal driver is located either in the junction box or if need be located in a 8" wide by 1.5" high canopy. EU1020 perimeter options include anyone of our applied digital prints or natural veneer products. All of our decorative perimeter options are available on our website under our page title Accents. Shown below with our Mar Earth digital print overlay

EU1025

EU1025 are available in square and rectangular configurations in several different sizes.

Mitered and chemically bonded at four corners allowing for aircraft cable supports at four corners

This Euro design is available with white or colored acrylic perimeters or any one of our digital prints

Exemplified on the right is a conceptual 48" square EU1025 with our Micro Nightshade exterior applied print on the exterior face and a Micro Yellow digital print on the interior face

EU1024A

The application of a highly translucent shade on an illuminated inner shade can produce a fixture with remarkable depth. The photo on the right is of our EU1024A with a mauve Lana pattern on clear acrylic offset against a white inner acrylic drum shade.

In addition to digital printed perimeter options, our EU1024 is available with frosted acrylic outer shades of various colors.

Please refer to our website for all of our optional accents.

EU1019A

Small drum pendant available in two different sizes suspended with three adjustable stainless steel aircraft cables and brushed nickel swivel grip lock mechanisms.

Like other Euro fixtures EU1009 provides a variety of decorative perimeter options.

Shown on the left is our EU1009A, 16" W by 8" shade with an oak veneer overlay

EU1009C Application: Medical Reception Area

Choose from a variety of bright vibrant patterns, colored acrylics, or micro veneers

Excels in applications where color, and clean ability are desired such as health care or hospitality settings

Shown on right is EU1009C with Hampton Blue pattern

EU1001

Double square shade pendant available in two different sizes. Inner all white acrylic box pendant with removable top diffuser and white bottom acrylic bottom.

Not all accents can be applied on all of our Euro fixtures. View specification sheets on our website for each to determine what decorative accents can be applied

Wesport can fabricate configurations and sizes not shown in the brochure or on our website

Consult your local rep for information on pricing or in specifying a Euro fixture with a different size or configuration

Euro is fabricated in the United States with care and special attention to detail

All Wesport fixtures are UL listed

NATURALS

Decorative accent options featuring natural products that are shaved micro thin as to allow their natural grains colors and textures to filter through.

Oak

DIGITAL PRINTS

Once applied on their acrylic frames our digital prints will not detach from their substrate. These high resolution UV resistant prints are designed to provide a variety of different visual textures in a mix of colored patterns. To better view these as well as all of our other digital print , please view these on our website under our Accents or request an actual sample from your local Wesport representative
